

DEPARTMENT OF PHYSICS

Student as Teacher

Objective of the practice:

- To develop presentation skills among the students.
- To improve learning and teaching ability
- To acquire the knowledge by the students.
- To avoid the stage fear among the students
- To Improve the self study

The Context

The Department of Physics is established in the year 2018. It has been felt that improvement of presentation skills is more important among the students to show their talent and capability. And also when they are giving the seminars, students get acquire the knowledge for the presentation there by improve the self study. Therefore, the Department has taken an initiative to motivate the students for the student seminars.

Practice

- The students will chose the interested topic on their choice
- The students will prepare the Power point Presentation.
- Presentations will be open for the all students.
- Students will give the presentations in the class room for the peer groups
- The entire practice will be monitored by the teacher mentor.

Evidence of Success

- Students are acquainted with the presentation skills
- It improved the self study.
- Students gain the more confident to express their views.
- It creates the interest to take up the research and project work

Problems encountered and resources required:

1. Motivating the students for the presentation is difficult as it's new for them.
2. Preparing and collecting the information for the presentation needs care and time.
3. Stage fear among the students as they are new for explain the things on the stage.
